

calendar problem

Posté par enallax - le 08 Juillet 2011 à 10:42

Hello,

I must want to ask if you can help me with the problem I meet when I open the calendar in the form.

I attach an image.

hi

that come from you template css class, there a class in your template who impact the calendar, you need to found what class (like p, td, table, div... padding or something like this) and adjust it

Hello,

Thanks for the intention to help me.

someone in the template's forum gave me the solution.

So I write it here:

I added:

```
/* added to fix calendar */
```

```
div.calendar .button { margin-right: 0px; display:table-cell;}
```

to the template css and the problem solved.

Thank you very much for asking.
