

Calendar Pop Up in wrong place

Posté par greenlizzard - le 22 Octobre 2012 à 07:52

The calendar pops up to the top of the page on the booking form, is there any way for it to pop up next to the arrival and departure dates boxes?

Hi There,

have downloaded the patch and applied it via ftp (Filezilla)

it still does not work, the calendar pops up to the top of the page,

Id there something else to try?

Regards

Gerald

it is an internet explorer **under 9** bug, then if you try with IE9 or other browser that need to work well. the patch is for IE8 and under version, and need to work if uploaded in the right place, if not... there other problem... but strange

Hi

just be sure that you install the good joomla version for the good joomla version !!
